

Release Note

Software Release 8-195.rez

For Legacy NIQ 800 and Early 4MB AR300 Series Routers

Software Release 8-195

This Release Note describes Software Release 8-195 which contains functionality and enhancements not available in the 8-175 and 8-181 releases.

This Release Note should be read in conjunction with the AR300/700 Series Router Software Reference for Software Release 1.9.1, available on the support site at www.alliedtelesyn.co.nz/documentation/rel191/.

WARNING: Information in this document is subject to change without notice and does not represent a commitment on the part of Allied Telesyn International. While every effort has been made to ensure that the information contained within this document and the features and changes described are accurate, Allied Telesyn International cannot accept any type of liability for errors in, or omissions arising from the use of this information.

Software Release 8-195 is to be used on 4MB SDRAM legacy NIQ 800 routers and early (4MB only) AR300 Series routers, and should be used primarily for upgrading from the 8-175 release. This will solve any issues there may have been with the 8-175 release.
